

Curriculum Statement – Summer Term 2018

Key Stage 2 SCIENCE

We use the Empiribox Science scheme which takes a different topic each term, and provides the resources for exciting practical sessions every week – teacher demonstrations and pupil / group investigations.

This term we are looking at *Physics – Forces, Magnetism and Space*

This will involve ..

- Introduction to Forces
- Friction
- Magnetism
- Air and Water Resistance
- Rocket science
- Earth and Space

All through this term the focus is on planning in scientific investigations.

Although the topic is the same for all year groups in Key Stage 2, the lessons will be differentiated so that all pupils can benefit from an exciting science curriculum with ‘hands on’ investigations every week.
