

Easter Egg Description Game

A fun Easter game for 2-4 players

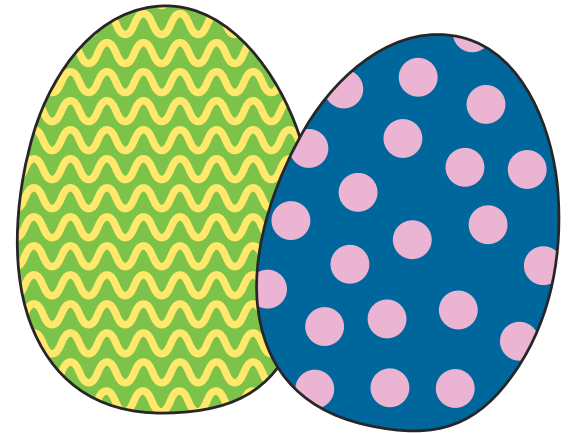

Place all the Easter egg pictures where all the players can see them.

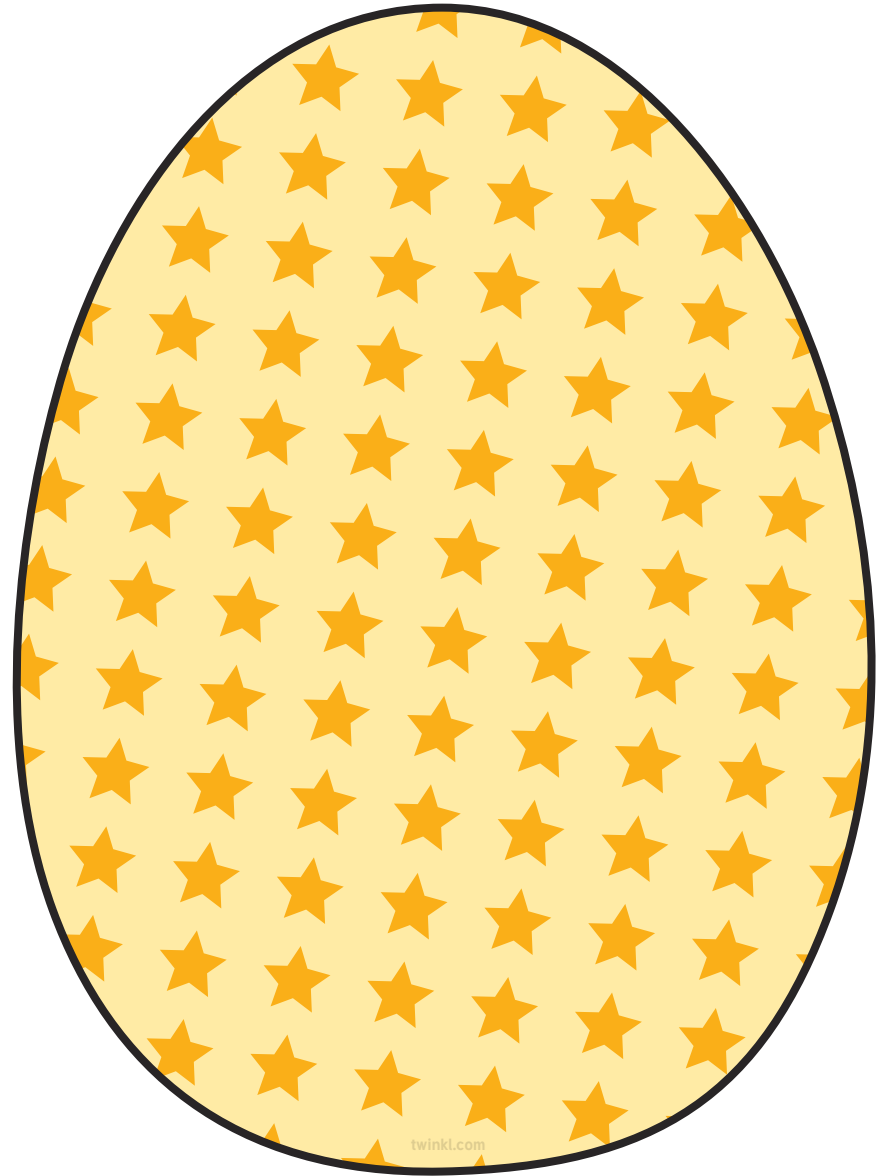

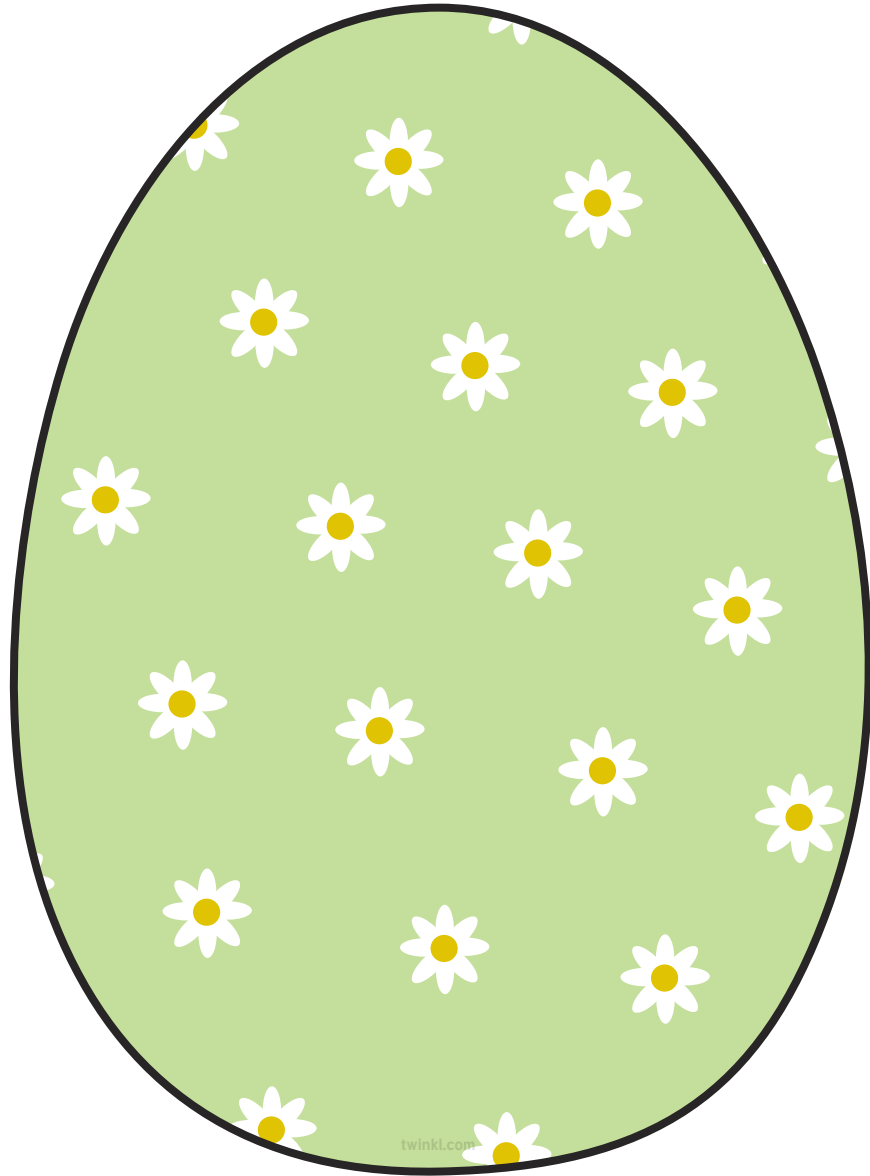

Choose a player to start the game. The first player chooses an egg to describe without showing the rest of the group their chosen egg. The player describes their egg for the rest of the group to identify. They may like to describe the colours and shapes they can see.

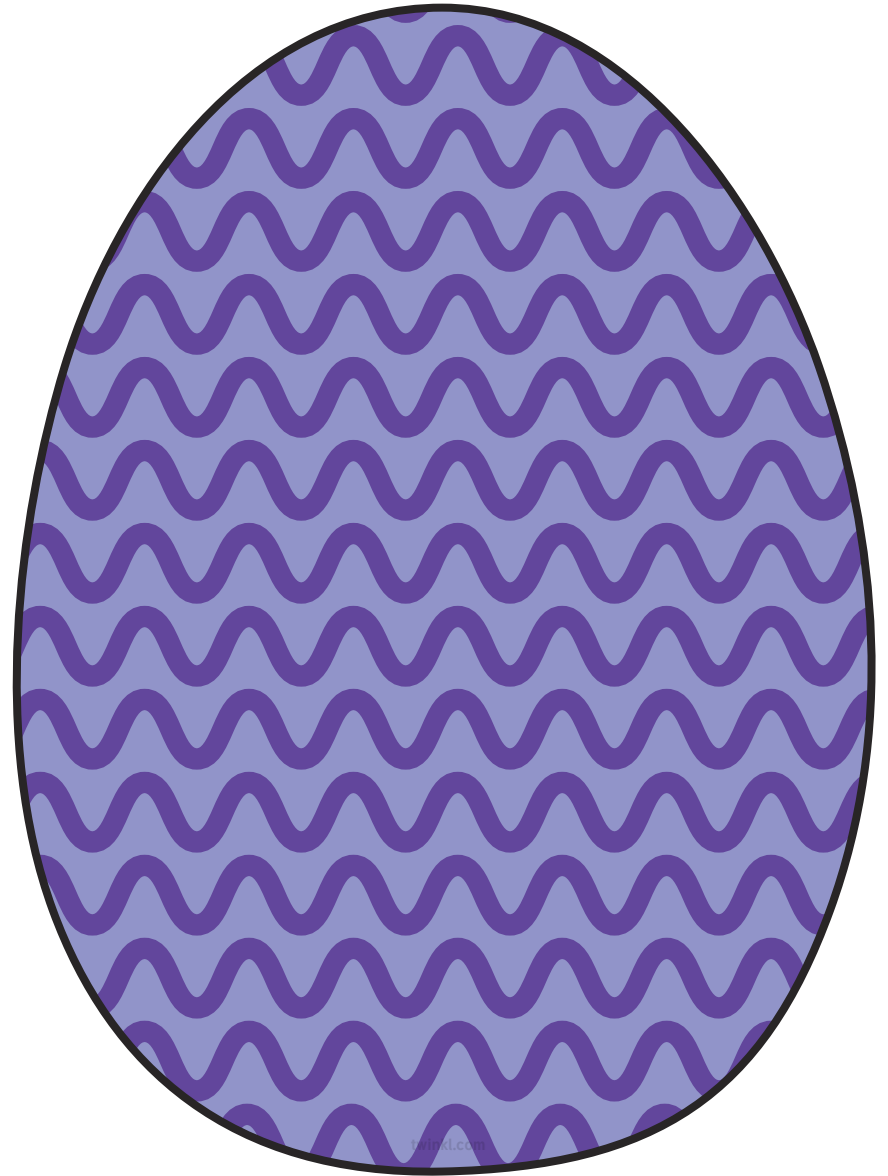

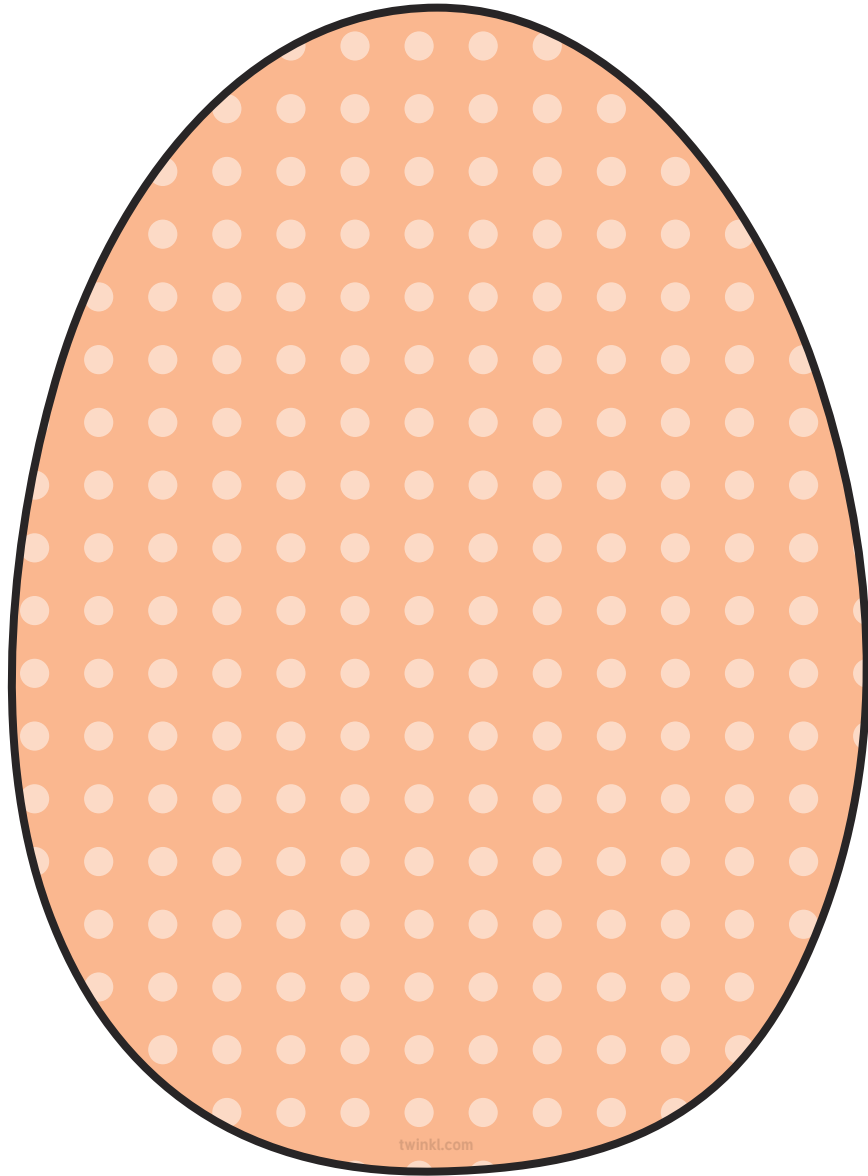

The rest of the players pick up the egg picture they think is being described – the first player to correctly identify the egg gets to hold on to the picture. This player then describes an egg for the rest of the group to identify.

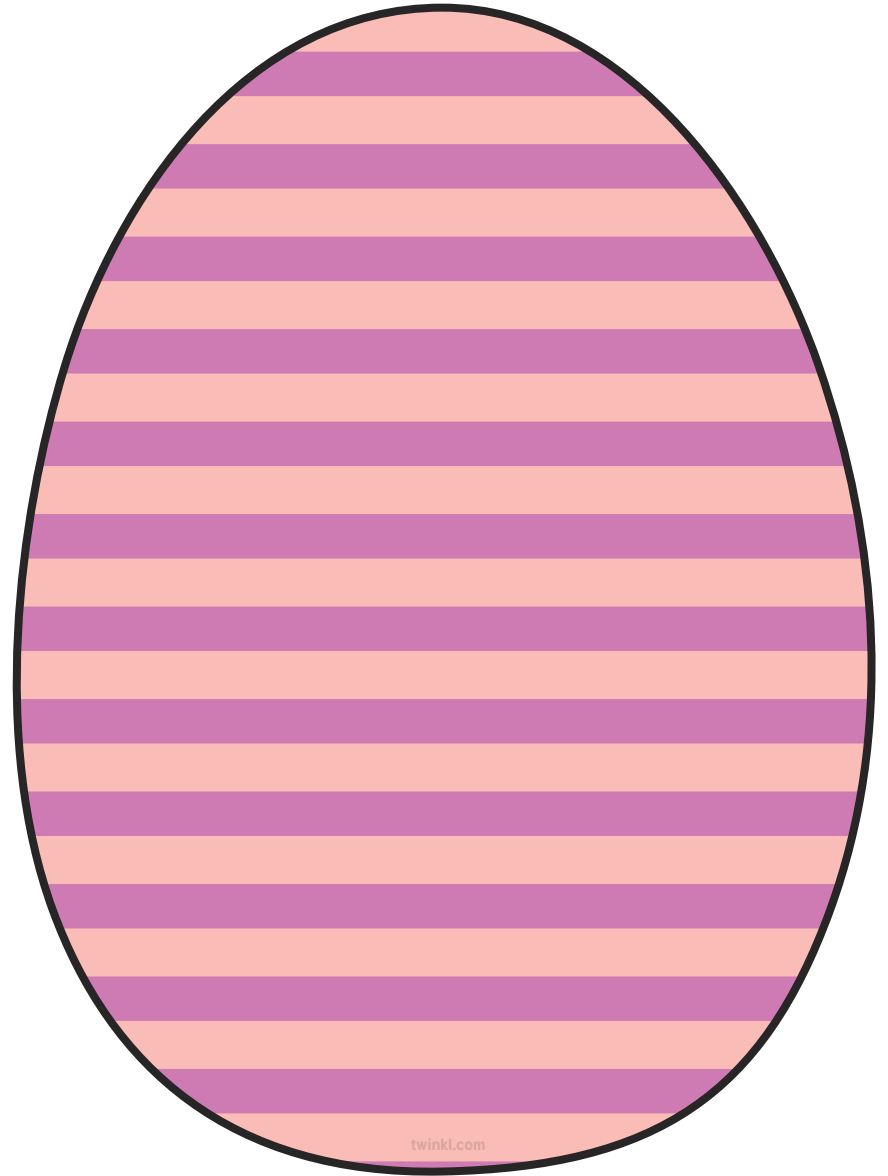

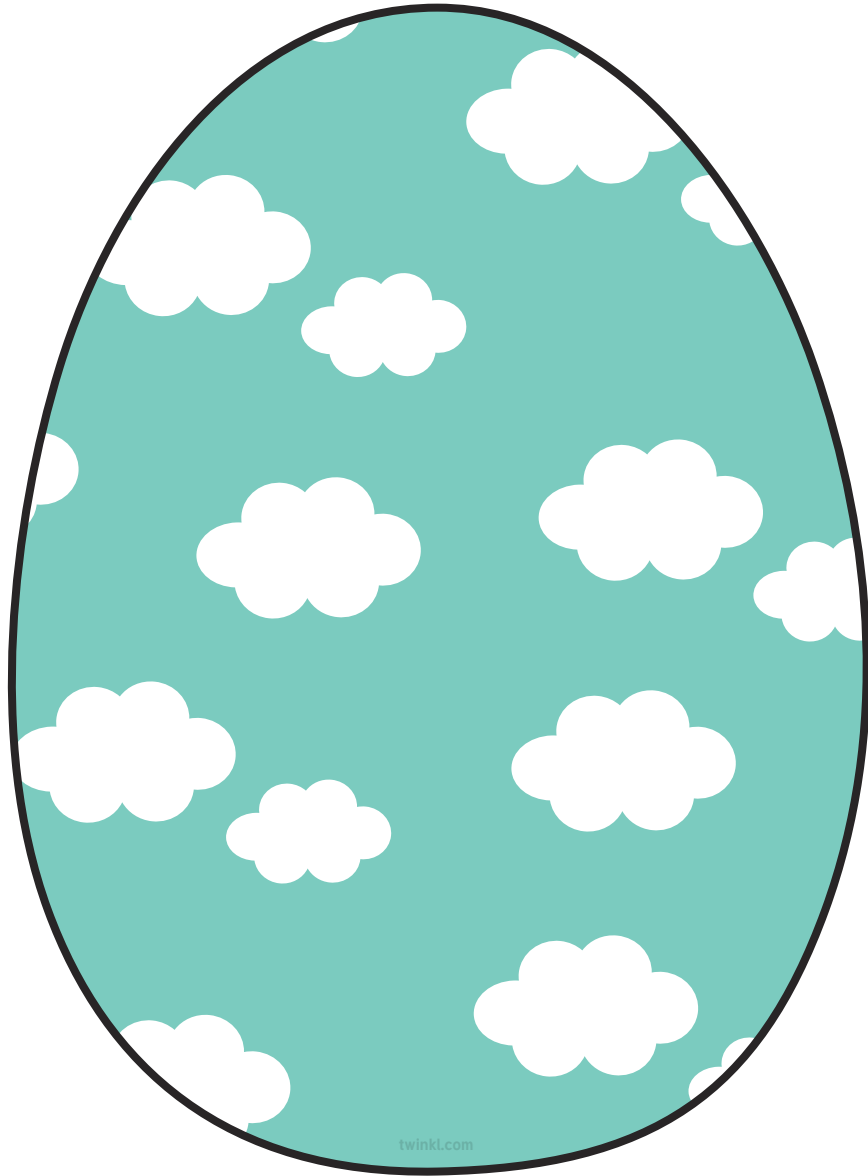

Play continues until all the eggs have been collected.

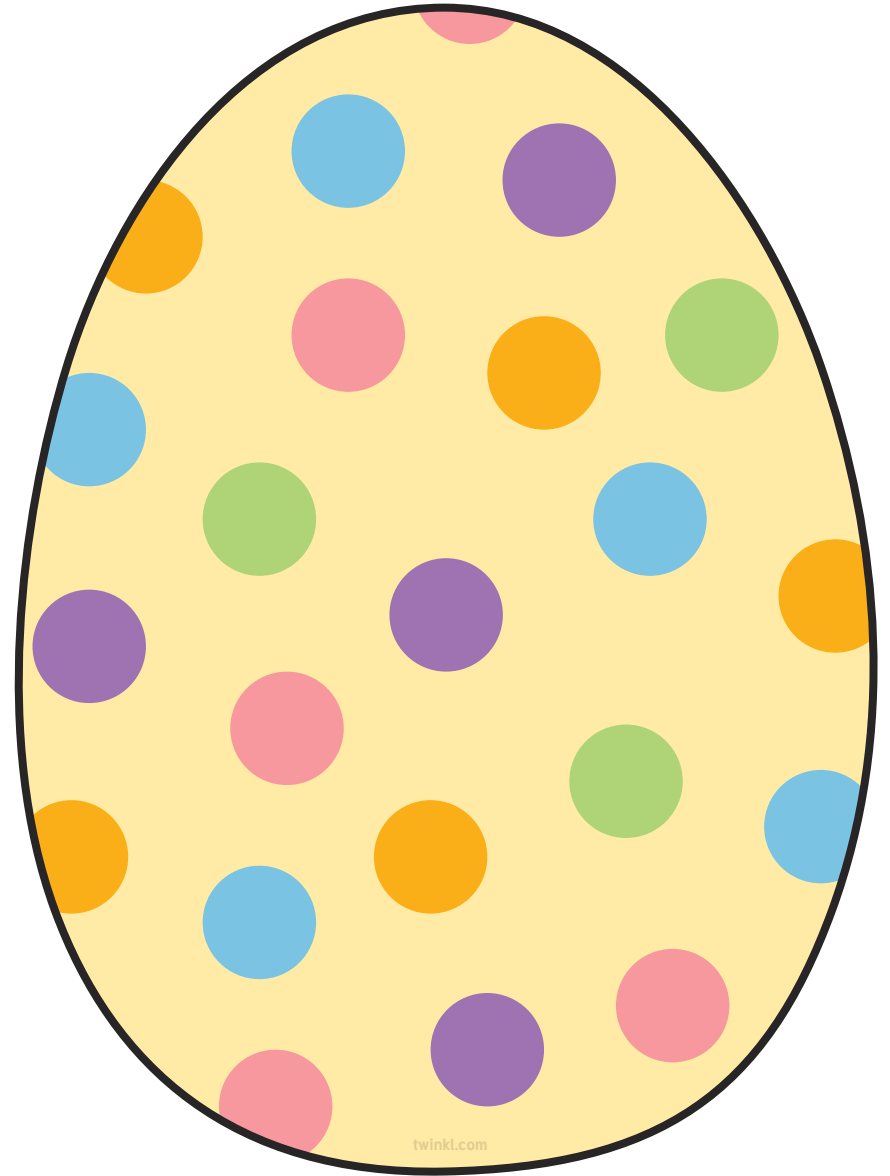

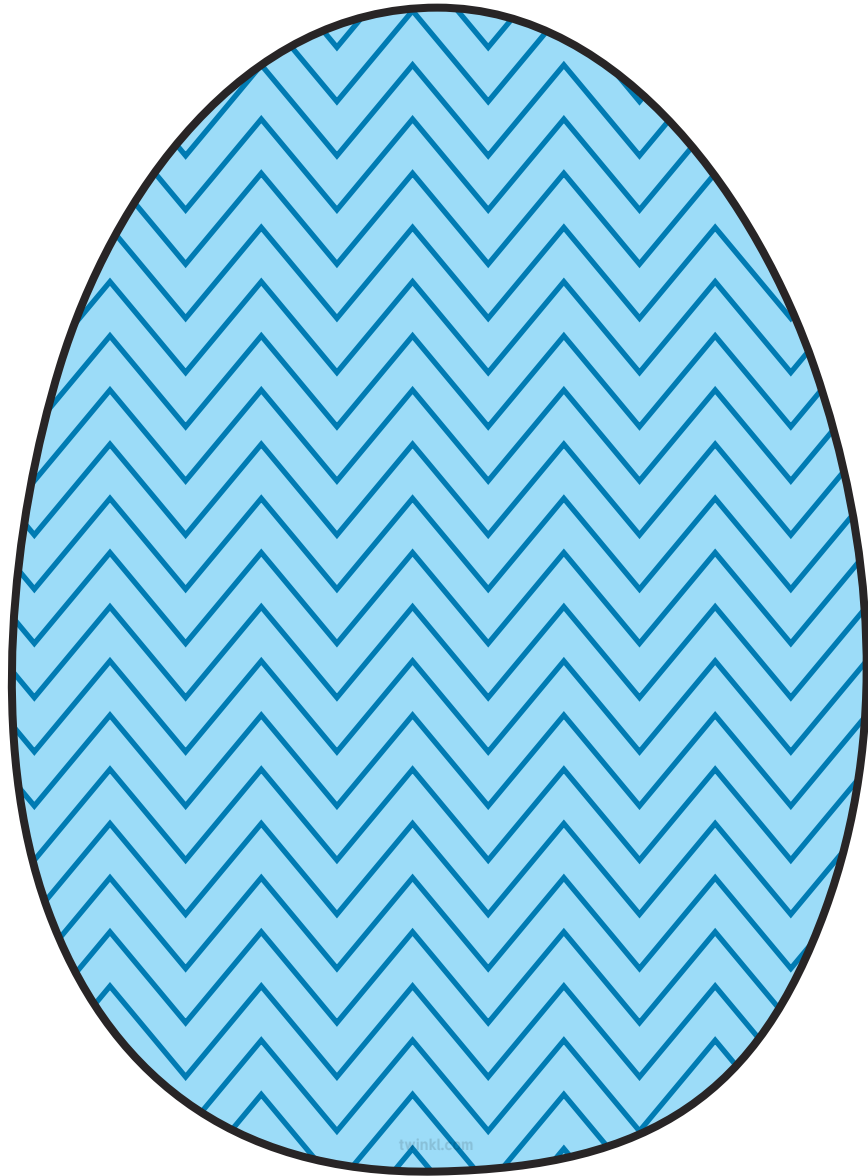

The winner is the player who has collected the most eggs at the end of the game.
