

## Money Problems

### Sheet 2

Read each problem. Work out what amounts to add or subtract. Write the answer.

1. Sita has £5 and 5p. Her brother has 60p. How much do they have altogether?	2. Mazi has £4.44 and he spends 40p on a biscuit. How much does he have left?	3. Susan has three 5p coins, Bill has three 50p coins. How much do they have altogether?
4. I have £2.57 in my purse. How much have I left if I give away 50p?	5. In the collection box there are five £1 coins, two £2 coins, three 10p coins, and four 2p coins. Write the amount in the box.	6. Sunil spends £1.05 on a pack of Pokemon cards. He has 80p left. How much did he start with?
7. Jim has three pounds, Fred has 30p and Tom has 9p. Write how much they have altogether.	8. Rama's hamster food costs 67p for a bag. He has £2.68. How much has he left when he has bought it?	9. Dog collars cost £5.15. If Sam gives the shopkeeper 5 pound coins and two 10p pieces, how much change does he get?
10. Wanda needs to save £4.50 for a cinema ticket. She has three pound coins and three 50p coins. Has she enough?	11. Miles needs £4.99 to buy a ticket to the film he wants to see. He counts his money and sees that he has five pound coins and a 10p coin. How much change will he have?	12. Bella has £2.23. If she spends 33p on a drink, how much has she left?

#### Challenge

We have saved £3.09. How many times do we need to add two 20p coins to have over £10?
