# A Cold Snap

Amazing Fact

The lowest temperature ever recorded at the South Pole is -89.2ºC, making it one of the coldest places on Earth.
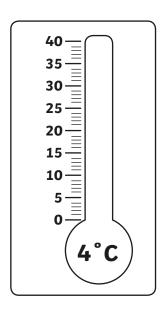

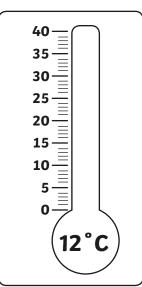

Challenge

Mark the thermometers below with the given temperatures.
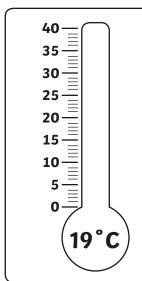

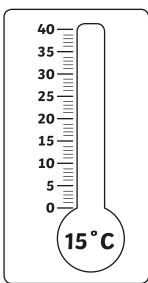

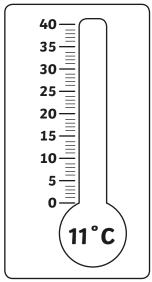

10°C

16°C

7°C

4°C

12°C

19°C

15°C

11°C

You could also try to find out:

- which places, if any, are colder;

- how scientists based at the South Pole survive the cold;

- when, and for how long, the South Pole gets sunshine;

- where the hottest place on Earth is.
