

# Predator - Rich Task

When we come to the end of a topic we complete what we call a Rich Task. This is a challenge that needs us to use the skills and information that we have developed over the term.

Your rich task for this topic is:

***Design your own predator!***

You need to:

- Create your predator - you can use parts of predators you have studied.
- Complete a fact file for your new predator - name/habitat/prey/size/etc.
- Create 3 food chains containing your predator.
- Draw a sketch of your predator.
- Write an acrostic poem using the name of your predator.
- Write a description of where your predator lives and draw a birds eye view map of it.
- Create a 3D model of your predator using recyclable materials.
- Write a short story about your predator going on a hunt.
- Design an information poster about your predator.
