

Maths and Numeracy Activities

There are 3 number activities this week, all of which you could do a little bit on every day: 1. Learning all about the Number 2, 2. Singing number songs and 3. Counting up to 10 and back down to 1:

1. Number 2

This week we are looking at number 2. Help your child to recognise number 2 by pointing it out whenever you see it every day this week:

- Ask your child if they can see a number 2 anywhere
- In the garden/on your walk, ask them to find you 2 leafs the same colour, 2 stones the same size and 2 sticks/twigs
- At home, ask them to find you 2 pens the same colour, 2 blocks/lego bricks and 2 toys
- Have a look through this PowerPoint together for more number 2 ideas to try throughout the week!

Click on the picture to open the PowerPoint on the Twinkl website. You might need to hold down CTRL when you click on it. If you can't open it, it is also on our school website under this Maths document you are looking at.

2. Number songs

Singing number songs together can help your child learn to count and to recognise numbers. In Nursery, we are working on 'rote counting' up to 10 (reciting numbers 1-10) and counting out up to 5 objects from a set. We are learning to recognise number 1-5 and to put them in the correct order.

Here are some of our favourite number songs:

[1, 2, 3, 4, 5 once I caught a fish alive](#)

[Zero, zero, superhero](#)

[5 currant buns](#)

[5 little speckled frogs](#)

[I can count to 10](#)

[5 little monkeys](#)

3. Reciting numbers back from 10

How is their rote counting down from 10 to 1 from last week coming along? If your child is confident reciting numbers up to 10, try practising counting down from 10 to 1. Here's another video to help: [Rainbow lego counting down 10-1](#)

If they are not yet confident on 1-10, practise reciting numbers 1 up to 10 instead with this little workout: [Count and Jump](#)
