

In History we will be finding out:

- About significant inventions of the last 100 years
- About inventions in the way we communicate
- About the history of flight and associated inventions

In Art we will be finding out:

- How technology has been depicted in art
- About techniques in traditional and modern art
- How to create digital art
- How to make a print

In Technology we will be:

- How to make a pinhole camera
- How levers, gears and cams work
- How to make a moving toy

Inventions that Changed the World

In I.C.T we will be:

- How the invention of the internet has changed the way we communicate
- How the world's scientists are sharing knowledge about inventions and the latest technology

In Science we will be:

- About the air around us and the science of flight
- How to make a paper glider
- About man-made materials and their properties
- How to carry out a scientific test

In Society we will be finding out:

- How technology and inventions affect people's lives
- How inventions have made life easier or harder
- About inventions in the home and host countries
- Why some countries have fewer or more technologies than others
