

Sports Day

Front Cover - create a front cover for our topic	Poster- Advertise sports day. Think about what information you will need to include. Date, time, is there a cost to enter, pictures.	Design a kit - one for each house.
Plan what events you would like - you can be as imaginative as you like - list the equipment you would need. Think about a race for each class in the school, or 2 races for each of the junior classes. Think about how difficult each race is.	Design place cards for the events. Come up with a points system.	Create a programme of events. How many children will be taking part? How many races will you need? What order will they be in?
Create a survey on which events you should include. Collate your results into a table and then produce a graph of your choice. This can be done on paper or using excel.	Create a video of yourself explaining/demonstrating one of the events of your choice.	As you are in charge you will have to give a welcome speech welcoming everyone and explaining how the day will run and what you will be looking for from the children. You can add in why you think sports days are important and what you hope we gain from the day
You will need to have a healthy snack bar. What could you sell? Price these items on a supermarket website and decide how much you will need to sell them for to make a profit.	Design a trophy for the winning house and design a medal for all the children who took part.	Think of 10 questions you would ask a sports super star.
