

Space Missions

Choose one of the challenges from the list below to do every day at home over the next week.

Some of the tasks are interactive worksheets that can be completed in J2e5. Copy the file shared with you and edit it to complete. Complete tasks on TEAMS and upload photos, pictures or videos to me when you have completed the challenges.

Read the eBook Jazz Harper: Space Explorer

Jazz has always admired her gran and loves nothing more than listening to her tales of exploration. Now, it is Jazz's turn as she and her mum blast off to where few have gone before: the planet Mars!

Aim to read a few pages every day using the PDF file which you can find in TEAMS.

Labelling the Planets of the Solar System

Recognise the eight planets in the Solar System by sight and in the correct order using this labelling activity.

Differentiated into three levels of difficulty, these Solar System worksheets ask you to name each planet correctly and, in some cases, research key facts about a planet of your choice.

You could even try to label where Pluto should be in the order of planets and write about why it isn't there.

Complete the interactive worksheet on J2e. Check your shared files.

Reading Comprehension

Read the first few pages of Jazz Harper: Space Explorer and answer the questions.

Complete the interactive worksheet on J2e. Check your shared files.

Jazz Harper: Space Explorer Crack the Code

You must work systematically to find the possible combinations that could crack the codes on Mars. Explain their reasoning and to solve problems through systematic working.

Complete the interactive worksheet on J2e. Check your shared files.
