

When your child has completed a task, you can upload their work onto their HWB area. This way their work can be saved into one area and your class teacher can look at and comment on their work. Click on Just2Easy. On the dashboard you can see 'Upload' and 'Camera'.

To upload click on upload button then 'choose file'. You can directly upload a document that they have completed on a computer such as word and power point. If they have completed a printed worksheet or created something you can take a photograph or video and upload it. Once you have selected a document or picture it will upload into 'My Files'.

If you want to take a photograph click on the camera button then click on the camera icon to take the picture. Next press the cloud and arrow button to upload it into 'My Files'.
