Disaster Zone!

Our project this half term has a geography focus and teaches children about the causes and impact of natural disasters involving water, flooding and erosion and the environmental factors which cause them. We will also follow the children's interests in other natural events. The children will write reports using factual data with a global dimension.

In addition, the children will develop skills to write leaflets and present findings from tests and investigations using scientific and geographical language. The children will learn how to become responsible global citizen by learning about the effects of pollution on our oceans. The children will apply their skills and understanding by creating a filmed news report/documentary using a green screening app. The children have already had their 'Homework Menus' which they helped to create. Their written project is due in on Monday 12th February, and we will hold a celebration Express afternoon on Thursday 15th February at 2.30pm in the Top Hall (please use main Reception entrance).

On Monday 22nd and Tuesday 23rd January, both Dosbarth Mercury and Neptune will go on a short walk in the locality, looking at the river Tawe and effects of erosion, flooding and pollution. Please could the children wear weather appropriate clothing (uniform plus a waterproof coat and trainers.)

Thank you for your continued support,

Mrs Roseblade, Miss Thomas, Mrs James, Mrs Wabey and Mrs Jones
