SEPTEMBER 2018

CELEBRATING SUCCESS

FROM THE HEADTEACHER'S DESK

This newsletter is dedicated to recent successes at Gowerton school. We have a selection of A level and GCSE exam success.

Gowerton School is proud of its pupils' accomplishments and we thank all pupils, staff, parents and the whole community for helping us maintain a high standard. This month we will be visiting each of our partner primary schools and welcoming year 6 pupils and parents to Open Events at Gowerton.

Every newsletter we comment on team and individual success and we have the most recent included here. If you have any news that you would like to share with us from past or present pupils please contact us.

William Arnold	5A* 3A 2B C	Llanrhidian

RETURN OF SIXTH FORMERS

Year 12 took part in a team building day run by the army and Year 13 received a talk from the University of Wales Trinity Saint David to launch the Individual Project of the Skills Challenge Certificate part of their Welsh Baccalaureate Qualification.

A day of building team moral and setting of expectations for the year ahead!

FURTHER NEWS

Year 7 pupils have already settled into Gowerton and many have joined lunchtime and after school clubs. On their first day a group of year 7 were full of excitement going to lunchtime drama club. Every lunchtime many girls and boys play football on the front lawn or cricket with Mr Jones on the main drive. After school is equally as busy. There has been training for various sporting teams - boys rugby, girls football and girls hockey. Good weather has helped with the enjoyment of moving to secondary school and has encouraged pupils to get involved in outdoor sports.

Year 7 pupils are now looking forward to greeting year 6 pupils to open events at the school. Some will also visit their ex primary school and talk with parents and year 6 pupils about their experience of transition. This will help to calm any nervous year 6 pupils and give them reasons to be excited about the move to secondary.

We had some visitors to the school recently. Nearly 100 Year 5 and 6 pupils from some of our partner primary schools participated in an 'Incredible Inventions' project launch. They worked with external providers to learn about scientists and inventors. There were opportunities for launching catapults and wearing virtual reality goggles. Later in the year there will be an exhibition to showcase the work achieved by the pupils.
