THINK

What 4-digit number will make this subtraction work?

$$\begin{array}{r} 3105 \\ - \square\square\square\square \\ \hline 1289 \end{array}$$

THINK

$$\square 99 \square - 1889 = \square$$

Write some possible digit numbers to go in the boxes and work out the answer.

 I am confident with column subtraction of 3-digit and 4-digit numbers.
