

# Calculating area

Calculate the area of each triangle.

$$\text{Area} = \frac{1}{2} \text{ base} \times \text{height}$$
$$A = \frac{1}{2} b \times h$$

Remember to give your answers in  $\text{cm}^2$  or  $\text{m}^2$ .

**THINK**

A triangle has an area of  $24 \text{ cm}^2$ . If the height is 4 cm, what is its base?

I am confident with working out the area of triangles.
