

Space Boggle

Amazing Fact

Space is big! If the Earth was a basketball, the Sun would be a sphere 26 metres across located 2.8km away.

Challenge

How many other words can you make from:

space: _____

planet: _____

earth: _____

sphere: _____

distance: _____

solar system: _____

galaxy: _____

astronaut: _____

You could also try to find out:

- how big and how far away the Earth would be if the Sun was a basketball;
- how big and how far away the moon would be;
- which are the biggest planets in the solar system;
- how the Sun compares in size to other stars in the universe.
