

Doubling

Doubling

trucks $6 \rightarrow 12$ double

$\square \rightarrow \square$

$\square \rightarrow \square$

$\square \rightarrow \square$

$\square \rightarrow \square$

$\square \rightarrow \square$

Join cubes to make different trains. Make trains that are twice as long.

Write the number of trucks on each train in the blue box. Then write its double.

Try doubling numbers from 11 to 20. Look for patterns in the units digits.
