

IAITH WORK FOR W/B 06/01/21

You are going to be gathering information to create a fact-file about dinosaur bones next week!

Think about what kind of information may be useful for a fact-file about dinosaur bones, for example:- different types of dinosaur, lengths of bones, weight of bones, number of bones in body, largest dinosaur bone, smallest dinosaur bone etc.

Make notes- either on paper (you can then send photographic evidence via Teams or email) or use Office365 in your Hwb account

Access National Geographical for ideas if you can.

Think about what you will put in the introduction of your fact-file

How many dinosaurs will you include in your fact-file?

Compare and contrast different dinosaur bones

Make sure that you save some images of dinosaurs that can be added to your fact-file

Think about questions that you could come up with as a 'quiz' section to your fact-file

Any images that you wish to include in your fact-file should be saved in your hwb account
