

# Sports Premium funding review 2016 - 2017

## How much did we receive as a school?

For the academic year 2016/17 we received **£8788**.

## Here is a summary of how our school used the funding in some key areas:

### Curriculum Provision

#### Competitive sporting opportunities

The Acle Cluster employed an extended schools worker (partly funded by Sports Premium Funding) to organise a range of competitive events held across the whole academic year. These events are keenly contested and encourage wide participation from all the schools taking part. They are extremely popular amongst our pupils and include Cross Country, Cricket, Football, Tennis, Swimming and Athletics.

Working alongside the extended schools worker, headteachers and subject leaders organised sporting events which all our pupils can take in, such as the Cluster Dance and Music event at the Open Venue in the summer term. This event is non-competitive but celebrates the diversity of approaches within each school to create memorable dance routines and encourages and promotes participation of both boys and girls (as do all our cluster activities).

**Cost - £3655**

Sport Premium funding has been spent on transportation so that we can increase participation in all the sports events provided by the cluster and travel to high quality venues, such as the UEA Sports Park, for competitive events.

**Cost - £370**

#### KS1

We worked with Premier Sport to develop high quality PE lessons which enriched the opportunities for children in Years 1 and 2. Specialist coaches provided lessons which built up the skills base for pupils within an exciting range of age appropriate sports delivered on a weekly basis. Staff members observed lessons and developed their own skills through joint planning and delivery of PE and Games. The coach from Premier Sport also ran a football club for pupils from Years 1 to 4, as well as games coaching for pupils of all ages, including preparation and coaching of our school sports teams.

**Cost - £2210**

#### KS2

We worked in partnership with Norwich City Community Sports Foundation (CSF) to help build on the core skill base identified for lower Key Stage 2 pupils, by working in specific sport areas such as invasion games which cover Football, High 5 Netball, Quicksticks Hockey and Tag Rugby. Striking and Fielding sports such as Rounders and Kwik Cricket, along with Net and Wall games such as tennis and volleyball which were also taught in lower KS2.

**Cost - £1750**

Our partnership with CSF enables more pupils in the school to access sports enrichment activities they organised, such as the new football festival at Colney.

CSF staff used ongoing assessment documents to help measure the impact of delivery and the progress of the pupils. Acle Primary and CSF worked together to implement a scheme of work and lesson plans which further impacted the teaching and learning of both staff and pupils. This approach helped sustain and maintain excellent sports provision for our pupils.

Other specialist sports provision included working with cricket and rugby coaches from Norwich School in preparation for high quality inter school competitions organised by our cluster and Norwich School. **Cost - £140**

We used sport premium funding to pay for a whole school initiative to get pupils more active and fit during lunchtimes - the "Golden Mile". This project, started by Premier Sport but led on a weekly basis by Year 6 pupils, encouraged pupils to gain running miles and improve their fitness levels. This popular sporting activity led to greater participation in running events organised by our school and within the cluster.

Year 6 sports leaders were responsible for developing sports skills at lunchtimes for their colour groups, leading to improved participation and standards when the pupils competed against each other in athletics (whole school sports day). **Cost - £300**

### **Staff training**

Sport Premium funded high quality training for our new sports subject leader and for other staff in sports such as tag rugby and cricket, in conjunction with the Norwich school and their coaches.

It paid for our Sports Leader to attend all Sports Partnership events at Thorpe St Andrew and to benefit from advice and support from briefing meetings held there.

**Cost - £250**

### **Extra-curricular clubs and opportunities**

A range of sports clubs and opportunities were organised throughout the year, some of which were subsidised for specific pupils. Sporting clubs included basketball, football, tennis, gymnastics, cross country, multi skills and dance.

### **Sports equipment**

A range of equipment and resources were purchased so that pupils developed healthy lifestyles in their recreation times. We had built a new Woodland Tower (giving pupils daily opportunities to challenge themselves and build up new skills) adjacent to the school playground; this was partly funded by sport premium. Sportshall athletics equipment was also purchased this year, to improve our pupils' athletic abilities during the winter months.

**Cost - £113**
