

**A big thank you to parents who participated in the book recommendations task!**

**Here are a list of books that our parents have recommended!**

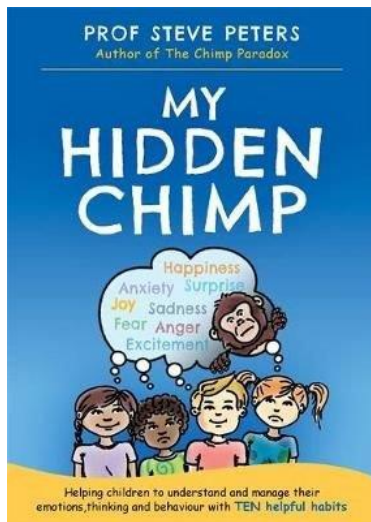

1. “Trees” by Piotr Socha and Wojciech Grajkowski has lots of fun facts and shows various ways in which trees are connected to our life. The book’s breathtakingly beautiful illustrations add to the feeling that trees are really quite awesome.

2. “Rosie Revere’s Big Project Book for Bold Engineers” by Andrea Beaty is an activity book based on the story “Rosie Revere, Engineer”. This book teaches that failure is nothing to fear, if you are an engineer 😊. Both titles (as well as other books in the series) are beautifully illustrated by David Roberts and are heaps of fun for children and parents alike.

3. "The Hidden Chimp" by Steve Peters has been an excellent learning tool for the whole family, mum and dad included. The book has fun activities that help everyone make friends with their hidden chimp...

A big thank you to

Agnieszka, mum of Gioia from year 3
