

I'm the King of the Castle (Design and Technology)

In this part of our topic work, we are going to work towards making a model of a castle.

PLEASE START COLLECTING EMPTY BOXES AND TUBES READY FOR THE TASK AHEAD

1. Think about the following questions.

What is a castle? Where were castles built? When were castles built? Why do you think castles were built? Who lived in the castles?

Draw and write your answers (there is an example of how to layout your work on the next page. You don't have to print it out you can use a ruler and draw your own boxes.)

What is a castle?	Where were castles built?
When were castles built?	Why were castles built?
Who built the castles and who lived in them?	

Once you have recorded your ideas have a look at the following 2 videos and see if you can add any information to your answers.

YouTube - castles for kids
